

# PALACINA INTERIORS PAINT

**GALAXY** 

## **AQUA-RESIST**

### **DESCRIPTION:**

Galaxy Aqua-Resist is a water based water repellent paint based on pure acrylic resin modified with water repellent additives meant for exterior purposes. Aqua-resist offers very good water beading, UV resistance fungal resistance, anti-algal and self cleaning properties hence very good for high humidity areas e.g. coastal areas.

**FINISH:** Matt

### **SCOPE AND PURPOSE:**

Aqua-Resist provides high water repellency while at the same time providing high water vapor and carbon dioxide permeability hence keeps the building practically dry and preventing damage caused by moisture e.g. soiling, blistering, algal and fungal attack. The water repellency of the paint means that any dirt sitting on the wall will be washed off hence dirt repellency and self cleaning of the paint.

### **SPREADING RATE:**

Approximately 10-12m<sup>2</sup> per litre per coat on smooth surface.

### **THINNING:**

Thinned with water.

### **METHOD OF APPLICATION:**

By brush, roller r spray

### **SURFACE PREPARATION:**

All surfaces must be clean, free from loose materials, oil or grease.  
The surface must be dry before application.

### **DRYING TIME:**

Surface dry 15- 20min @25oC hard dry 4-6hrs

### **RECOATING:**

Despite the paint being water repellent, it can be painted on any matt emulsion paint and can also be recoated without interfering with adhesion.

### **GUARANTEE:**

If applied as per specification with proper surface preparation the paint will last 10 years problem free.
