

# PALACINA INTERIORS PAINT

**GALAXY** 

## **GALAXY EGG SHELL ENAMEL PAINT**

### **DESCRIPTION**

Galaxy Eggshell Enamel paint is based on high quality synthetic (Alkyd) resin and gives exceptionally hard bearing eggshell finish. It can be scrubbed hard, withstands steam and moisture and keeps its eggshell finish under the severest of conditions.

**FINISH:** Egg Shell

### **SCOPE & PURPOSE**

Recommended for interior and exterior use on all metals, walls, ceilings and woodwork. Ideally suitable for high traffic areas, corridors, bathrooms, kitchens, toilets, showers etc. Its high abrasion resistance allows repeated washing. The eggshell sheen is specifically designed to give the properties of a full gloss enamel without the glare.

**SPREADING RATE:** Approximately 14 square metres per litre per coat.

**THINNING:** White Spirit may be used, if necessary.

**METHOD OF APPLICATION:** By brush, roller or spray. Stir well and use straight from can.

### **SURFACE PREPARATION**

Sound painting practice requires new surfaces to be clean and dry, then primed with appropriate Galaxy Undercoat or Primer. Previously painted surfaces be free from loose of flaking materials, cleaned and rubbed down to a smooth surface.

**DRYING TIME:** Dust free : 2 - 4 hours.  
Recoating : 24 hours.

### **SPECIFICATION FOR USE**

**NEW WOOD** Apply one coat Galaxy pink, white or aluminium wood primer followed by one coat Galaxy Super Undercoat and one or preferably two coats of eggshell enamel.

### **BARE METAL**

Apply one coat of the appropriate Galaxy Primer (Zinc Chromate) followed by one coat Galaxy Super Undercoat and one or preferably two coats of Galaxy Eggshell enamel.

### **REVIOUSLY PAINTED SURFACE**

Prepare and touch-in bare patches repair areas, with appropriate Galaxy Primer followed by Super Undercoat.
